September 1st
“DRIVE-IT DAY”
“OLD CAR DAY”

Old Car Day
Thursday September 1st 2022.
Bethany Reserve; Bethany Road, Bethany 11.00am
BYO Lunch

The first day of Spring, September 1st is promoted by the Federation of Historic Motor Vehicles SA as “Drive It Day” in SA. You are encouraged to take your historic vehicles out so that the public can see them. Take them to work, take them shopping, go for a drive, organise a run.

The Gawler Veteran Vintage and Classic Vehicle Club invites your club or club members to join us at Bethany Reserve; Bethany Road, Bethany at around 11.00am on Thursday September 1st 2022.

The Gawler Club has organised runs to Bethany starting as follows:

Fremont Park, Elizabeth
Princes Park, Gawler Showgrounds, Gawler

All runs meet at 9.00 am for 9.30 am start.
You are welcome to join us, organise your own runs, or just turn up.

It is all very informal, BYO lunch, toilets and a large shelter are available, but we suggest that you bring chairs.

Unlike the last 2 years, at this stage no Covid conditions apply, but please comply with any health conditions that may be advertised at the time of the event. In particular, please do not attend if you have cold or flu like symptoms.

It is a great opportunity to mix informally and share our hobby. So, come along, meet with fellow enthusiasts, have a chat, give the old vehicle an airing.

More Information: Alvin Jenkin 85292504 or email e-torque@gawlerclub.com

Classic cars 'hit environment less'

Research has found that compared to modern vehicles, classic cars are much less damaging to the environment.

The average classic emits 563kg of carbon dioxide per year, yet an average passenger car has a 6.8-tonne carbon footprint immediately after production. A specialist classic and collector vehicle industry report by specialist in-

surance provider Footman James, based in Dudley, also found that two-thirds of classic car enthusiasts are already concerned about climate change.

The Indicator Report says that though a modern car would be more efficient and use less fuel if used on a daily basis, the environmental cost of manufacturing a new vehicle negates this.
